EDUCATION

Bachelor of Information Technology

Lincoln University

• 2021/Feb - 2024/Feb

Relevant Coursework: C programming, Object Oriented Programming (JAVA), RDBMS with SQL, Discrete Math's, Data Structure and Algorithms, Artificial Intelligence, Computer Networks, E-commerce, Software Engineering, Software Project Management, Cyber Security, Multimedia System, Business Research Methods, Cloud Computing(AWS) and so on.

PROJECT WORKS

Cafe Management System (2023): Developed a desktop-based java in swing framework for managing daily functionalities like order, categories, product, billing and so on. Implement water-falls model for testing. Used sorting, searching, and editing features for maintaining consistence of system data. Integrated payment method.

Chatting Application (2022): Designed and developed 'Chatting Application' in MERN framework as the college project for Software Engineering. Used React.js, MongoDB, Node.js and Socket.IO for implementing user friendly and interactive frontend, handling dataset, backend development and user profile management. Ensured the application was responsive and optimized for high performance.

Hotel Website (2021): Designed the UI/UX of Hotel website using HTML/CSS and Bootstraps. Added different templates for proper viewing interactive homepage, about page, contact page, gallery and dining page. Automatic page responsive, user friendly navigation and high-quality visuals were its surplus features.

CERTIFICATIONS

Broadway Infosys

Java Developer

• 2023/Jan - 2023/Apr

- Certified ISO 9001:2015 classed training for Professional Java Package.
- Deep understanding of core and advance Java, Spring Boot framework, Swing framework.
- Learned to design, develop, test and implement high end Java Projects.
